Letter of reference for Construction Services Inc.

To whom it may concern:

The Carlisle Community School District has used CSI on a number of construction projects over a nearly seven year span. To date they have supervised an elementary remodeling project, remodel of three high school science rooms, a four room elementary addition, football stadium renovation, high school gymnasium remodel, major Early Childhood addition with small gym, and most recently a \$9 million dollar new middle school (opened fall 2007.) We have been well-served on every project.

With all of the companies seeking to solicit the school construction dollar, this is a group that delivers. Perhaps the biggest strength brought to bear was the involvement of the highest level management personnel and their willingness to react immediately to customer concerns and to never allow small issues to become big ones. Construction is an inexact science and the ability to anticipate and react to potential problems or avoid them altogether is an invaluable commodity.

Over the past seven years we've learned a great deal about the construction business from CSI. They've supported our own efforts to take on smaller construction projects thus hopefully saving some construction soft costs. But for major construction projects we have been very satisfied with the services provided by CSI. Please feel free to give me a call should you want to visit further.

Sincerely,

Tom lane  
Superintendent  
Carlisle Community Schools
