

Jordan Creek Center for Aesthetic Dentistry **Pinehurst Building / West Des Moines**

Construction Services, Inc. completed the dental office project for Dr. Joe Solinger on the first floor of the Pinehurst Building in West Des Moines. This project included multiple floor finishes including ceramic tile, VCT, and hardwood floor. High quality materials were used throughout the 2400 SF dental office. The reception area contains custom receiving desk, pendant lighting, ceramic flooring and carpet detail cut in arc to distinguish the waiting area. A frosted glass doorway etched with the company logo leads to the patient areas.

This office is highly visible upon entry in the main corridor of the Pinehurst Building.
